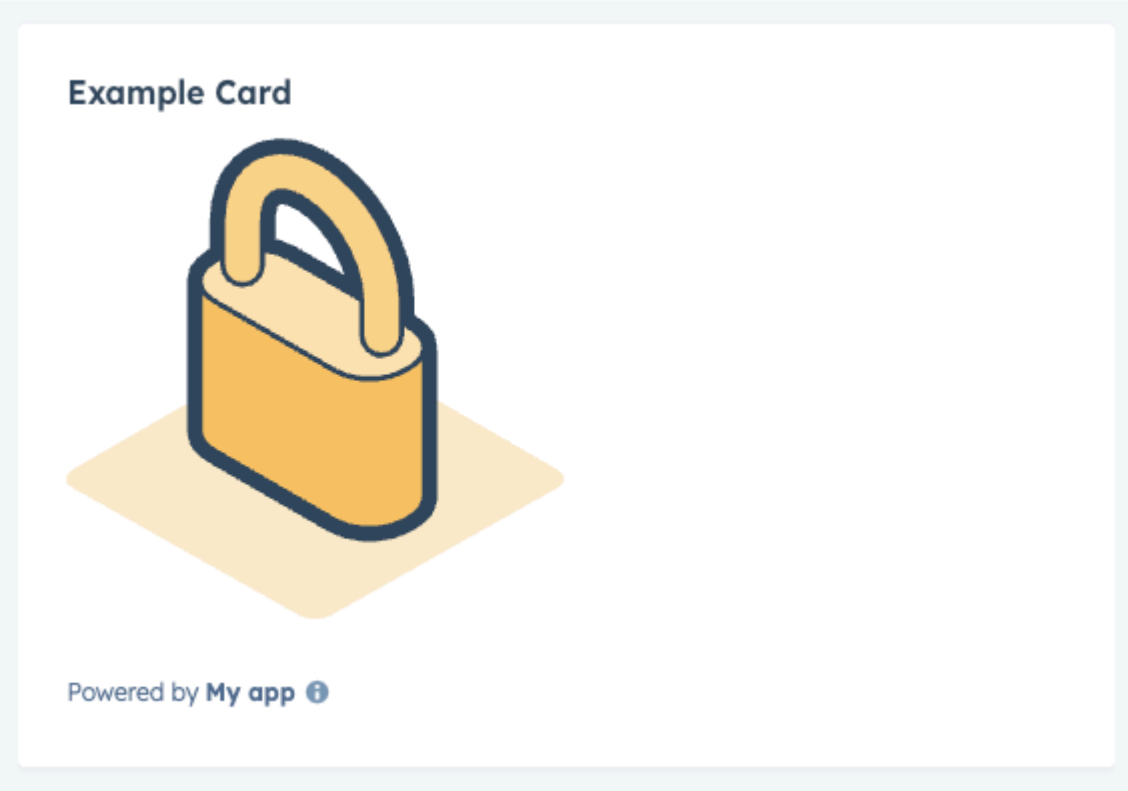
Standard components

Illustration

Learn about the Illustration component for use in UI extensions.

The `Illustration` component renders an illustration from HubSpot's illustration library. Use this component to add a visual indicator to your app card.



HubSpot Developers

```
    <Illustration
      name="lock"
      alt="Lock icon indicating content is currently restricted or inaccessible
      width={300}
      height={300}
    />
  );
};
```

Props

Prop	Type	Description
`alt`	String	The illustration's alt text for accessibility. Default value is `<name> illustration` .
`height`	Number	The height of the illustration in pixels.
`name`	String	The name of the illustration. See .
`width`	Number	The width of the illustration in pixels.
