Standard components

List

Learn about the List component for use in UI extensions.

The `List` component renders a list of items. Each item in `List` will be wrapped in `<li>` tags. A list can be styled as inline, ordered, or unordered with the `variant` prop.

- List item 1
- List item 2
- List item 3

```
import { List } from '@hubspot/ui-extensions';

const Extension() {
  return (
    <List variant="unordered-styled">
      <Link href="www.hubspot.com">List item 1</Link>
      <Link href="www.developers.hubspot.com">List item 2</Link>
      <Link href="www.knowledge.hubspot.com">List item 3</Link>
    </List>
   );
}
```

Props

Prop	Type	Description
`children` Required	`ReactNode`	The content of the list. Each child will be wrapped in an `li` tag.

HubSpot Developers

›

`variant`	`"inline-divided"` | `"inline"` | `"ordered-styled"` | `"ordered"` | `"unordered-styled"` | `"unordered"` **Default:** `"unordered"`	The type of list to render.

Variants

By default, lists will be configured as vertically stacked list items without bullets. To customize the styling, use the `variant` prop, as shown below.

To create a bulleted unordered list:

Unordered (styled)

- List item 1
- List item 2
- List item 3

```
<List variant="unordered-styled">
  <Link href="www.hubspot.com">List item 1</Link>
  <Link href="www.developers.hubspot.com">List item 2</Link>
  <Link href="www.knowledge.hubspot.com">List item 3</Link>
</List>;
```

To create a numbered list without styling:

Ordered

List item 1
List item 2
List item 3

HubSpot Developers

```
</List>;
```

To create a numbered list with styling:

Ordered (styled)

1. List item 1
2. List item 2
3. List item 3

```
<List variant="ordered-styled">
  <Link href="www.hubspot.com">List item 1</Link>
  <Link href="www.developers.hubspot.com">List item 2</Link>
  <Link href="www.knowledge.hubspot.com">List item 3</Link>
</List>;
```

To stack list items horizontally:

Inline

List item 1 List item 2 List item 3

```
<List variant="inline">
  <Link href="www.hubspot.com">List item 1</Link>
  <Link href="www.developers.hubspot.com">List item 2</Link>
  <Link href="www.knowledge.hubspot.com">List item 3</Link>
</List>;
```

To stack list items horizontally with a divider between each item:

HubSpot Developers

```
<List variant="inline-divided">
  <Link href="www.hubspot.com">List item 1</Link>
  <Link href="www.developers.hubspot.com">List item 2</Link>
  <Link href="www.knowledge.hubspot.com">List item 3</Link>
</List>;
```
