Set up demo scheduling from the app listing page

Learn how to let contacts submit a form or schedule a meeting from your app listing page.

When setting up your app listing page, you can add a scheduling page and/or form to let potential customers schedule a demo with you.

> This feature is only available for accounts building apps on the **latest version** of the developer platform (2025.2).

Add a scheduling page and/or form to an app listing

In your developer account, navigate to **Marketplace** > **App Listings**.

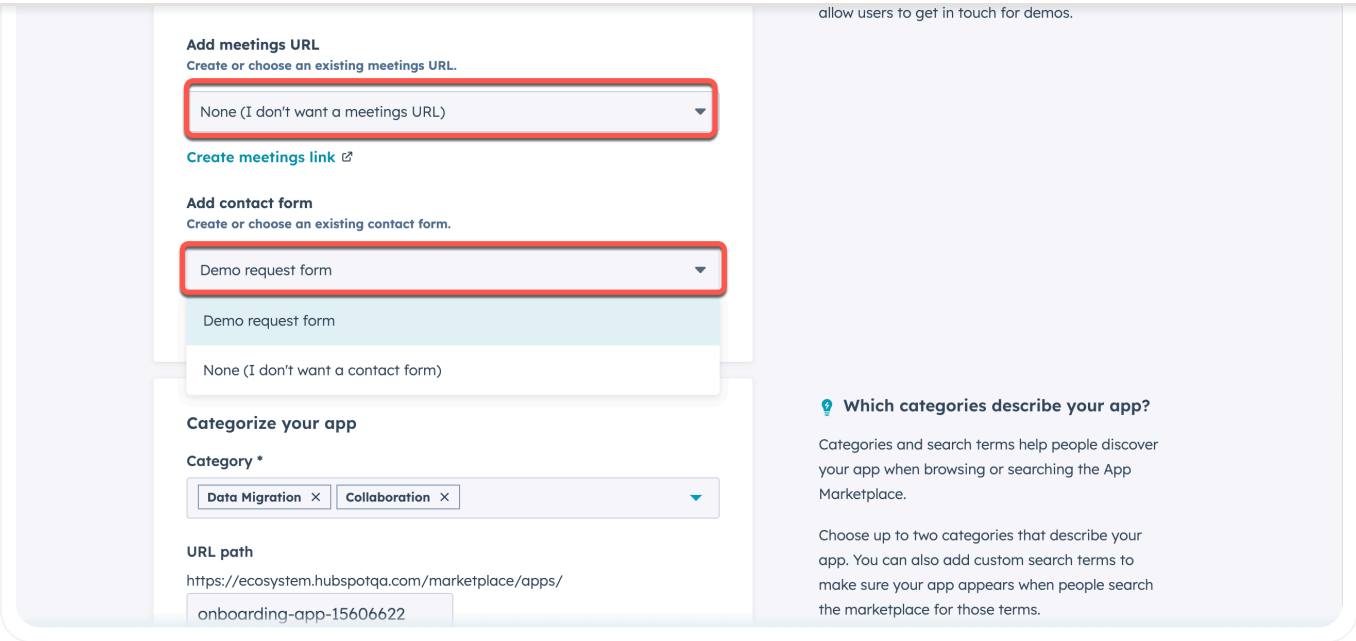
Hover over a listing and click **More**, then select **Edit**. Learn more about **creating an app listing**.

On the *Listing Info* tab, add options for scheduling a demo:

To add a meetings link, click the **Add meetings URL** dropdown menu and select a **scheduling page**. To create a new scheduling page, click **Create meetings link**. Learn more about working with **scheduling pages**.

To add a form, click the **Add contact form** dropdown menu and select a **form**. To create a new form, click **Create contact form**. Learn more about **working with contact forms**.

HubSpot Developers



In the top right, click **Validate & submit**.

Once your changes have been approved, your customers will see an option in the top right of your app listing to schedule a demo or request to be contacted. If you've added a scheduling page and a contact form, both options will be available in the *Schedule demo* dropdown menu.
