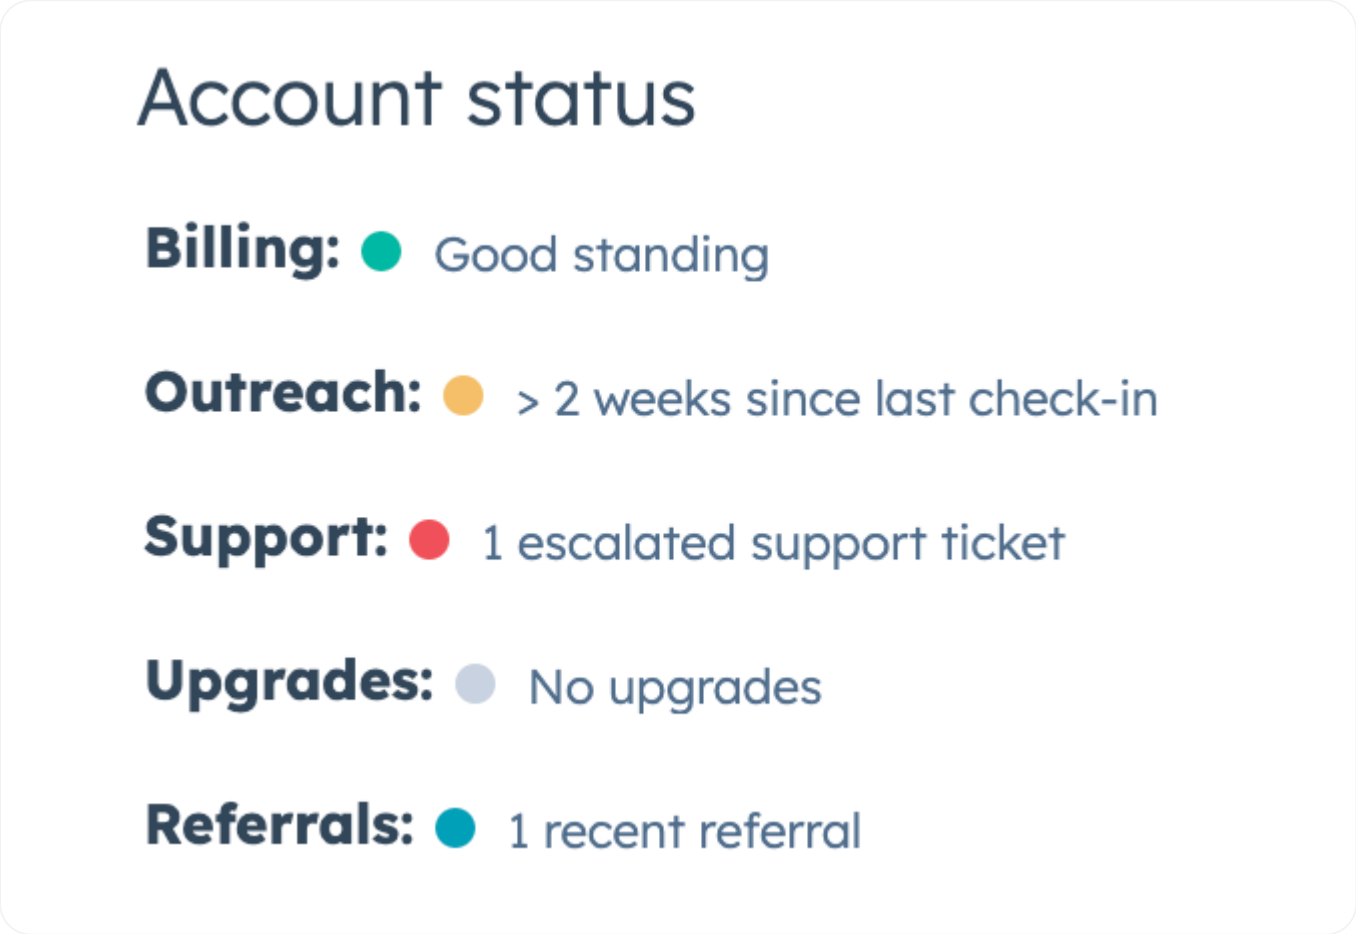
Standard components

StatusTag | UI components

Learn about the StatusTag component for use in UI extensions.

The `StatusTag` component renders a visual indicator to display the current status of an item. Status tags can be static or clickable for invoking functions with the `onClick` prop.



HubSpot Developers

```
    <Flex direction="column" gap="sm">
      <Heading>Account status</Heading>
      <Flex direction="column" gap="sm">
        <Text format={{ fontWeight: "bold" }}>
          Billing: <StatusTag variant="success">Good standing</StatusTag>
        </Text>
        <Text format={{ fontWeight: "bold" }}>
          Outreach: <StatusTag variant="warning">> 2 weeks since last check-in<
        </Text>
        <Text format={{ fontWeight: "bold" }}>
          Support: <StatusTag variant="danger">1 escalated support ticket</Stat
        </Text>
        <Text format={{ fontWeight: "bold" }}>
          Upgrades: <StatusTag>No upgrades</StatusTag>
        </Text>
        <Text format={{ fontWeight: "bold" }}>
          Referrals: <StatusTag variant="info">1 recent referral</StatusTag>
        </Text>
      </Flex>
    </Flex>
  );
};
```

Props

Prop	Type	Description
`hollow`	Boolean	When set to `true`, the status tag's dot will be a ring instead of a filled-in circle.
`onClick`	`() => void;`	A function that will be invoked when the status tag is clicked. It receives no arguments and its return value is ignored.
`onRemoveClick`	`() => void;`	A function that will be invoked when the remove icon is clicked.

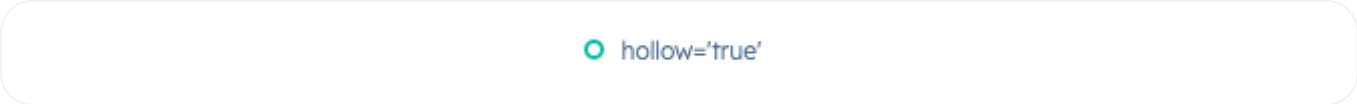
`variant`	`'default'` (default) | `'info'` | `'danger'` | `'warning'` | `'success'`		The color of the dot indicator. See the **variants section** for more information.

Variants

Using the `variant` prop, you can configure the indicator severity color:

- `'danger'` : a red dot indicating a negative state, such as error or failure.
- `'default'` (default): a grey dot indicating a neutral state.
- `'info'` : a blue dot indicating a general or informative state.
- `'success'` : a green dot indicating a positive state, such as confirming success or completion.
- `'warning'` : a yellow dot indicating a cautionary state, for when something needs attention or is time-sensitive.

Using the `hollow` prop, you can configure the dot to be a filled circle or a ring:



Using the `showRemoveIcon` prop, you can include a clickable icon to remove the status indicator.

Use an `'info'` status tag to indicate that a customer is active.

Use a `'success'` status tag to indicate that an item in a to-do list has been completed.

Use a `'warning'` tag to indicate that a deal is expiring soon.

Use a `'danger'` tag to indicate that an error happened when trying to sync a specific property in a table.

Guidelines

DO: make tag text concise and clear.

DO: ensure that tag variants are used consistently across the extension.

DON'T: use tags in place of buttons or links.

DON'T: rely on color alone to communicate the tag's meaning. Ensure that tag text is clear and helpful.
