Publish to the HubSpot Marketplace

View contacts created from the Marketplace

Learn how to access a segment of contacts who have interacted with your HubSpot Marketplace app listings.

When contacts interact with your HubSpot Marketplace listing, they are added to a specific contact segment in the associated developer account. You can then connect with them to see if the app would be a good fit for their needs. The developer account associated with the app must be using HubSpot's free tools.

Understand requirements

The developer account associated with the app must be using HubSpot's free tools.

This feature is only available for accounts building apps on the **latest version** of the developer platform (2025.2).

Criteria for applicable contacts

Contacts will appear on the segment when they take one of the following actions on your marketplace listing:

Clicked a video or screenshot.

Clicked the *View the setup guide* link.

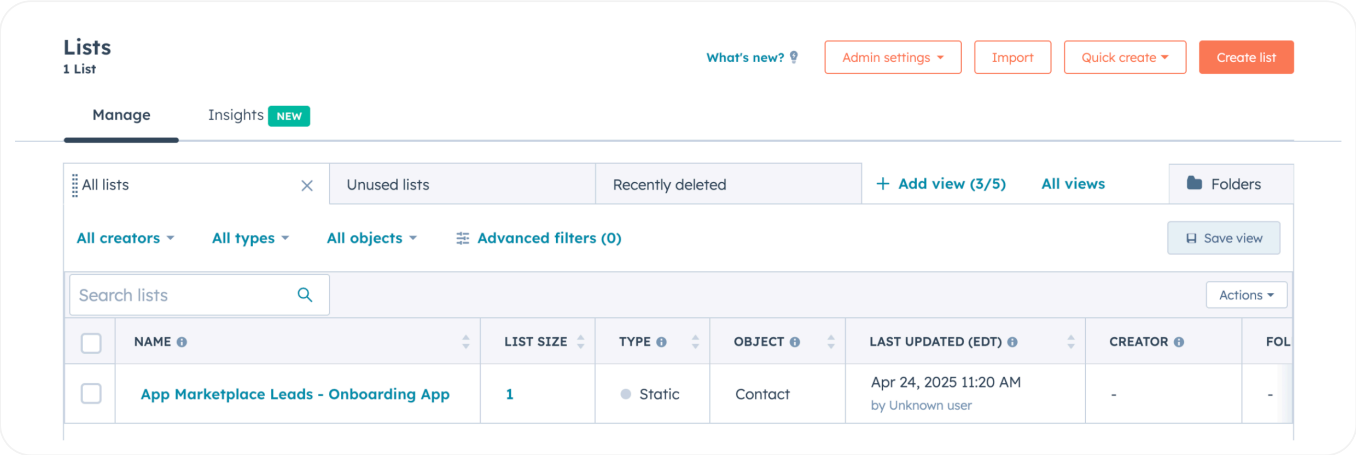
Clicked the *Company Website* link.

Clicked the *Install* button.

Only contacts who are logged into HubSpot when they access the marketplace listing will be added to the segment.

Access marketplace listing contacts

HubSpot Developers



The following properties will be populated for each contact:

First Name

Last Name

Company

Email

You can click the **name** of a contact to access its record page, where the corresponding actions they took will be listed on the timeline. Each event will also include the name of the app they were interacting with.
