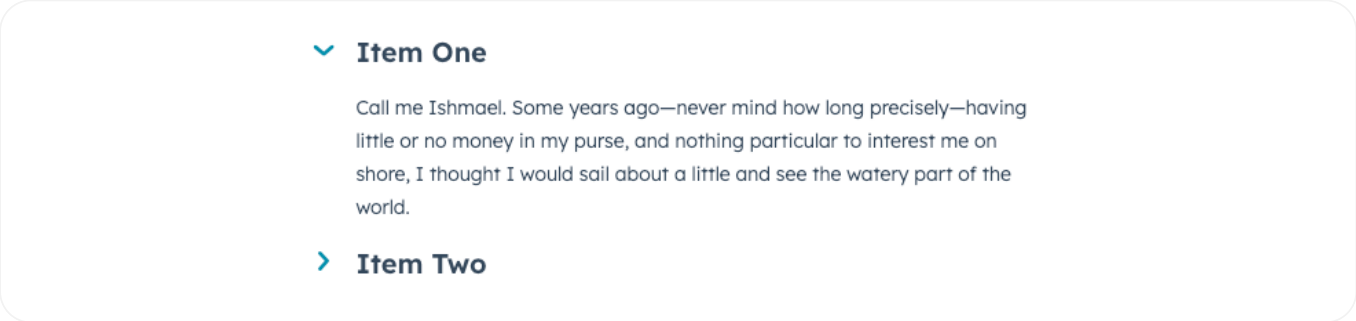
Standard components

# Accordion

Learn about the accordion component for use in UI extensions.

The `Accordion` component renders an expandable and collapsable section that can contain other components. This component can be helpful for saving space and breaking up extension content.



```
import { Accordion, Text } from "@hubspot/ui-extensions";

const Extension = () => {
  return (
    <>
      <Accordion title="Item One">
        <Text>
          Call me Ishmael. Some years ago—never mind how long precisely—having
          nothing particular to interest me on shore, I thought I would sail ab
          the world.
        </Text>
      </Accordion>
      <Accordion title="Item Two">
        <Text>Second inner text</Text>
      </Accordion>
    </>
  );
};
```

| | | |
|---|---|---|
| Required | | opens. |
| `title` Required | `string` | The accordion's title text. |
| `defaultOpen` | `boolean`<br>Default: `false` | When set to `true`, the accordion will be open on initial page load. The `open` prop takes precedence over this prop. |
| `disabled` | `boolean`<br>Default: `false` | When set to `true`, the accordion's state cannot be changed. |
| `onClick` | `() => void` | A function that will be invoked when the accordion title is clicked. This function receives no arguments and its returned value is ignored. |
| `open` | `boolean` | Controls the accordion's open state programmatically. When set to `true`, the accordion will open. Takes precedence over `defaultOpen`. |
| `size` | `"extra-small" \| "md" \| "medium" \| "sm" \| "small" \| "xs"`<br>Default: `"small"` | The size of the accordion title. |
| `testId` | `string` | Used by `findByTestId()` to locate this component in tests.<br>See: Testing utilities reference |
