Listing your app

Create an app listing setup guide

Learn more about creating a publicly available setup guide to include with your HubSpot Marketplace app listing.

In order for an app to be **listed** or **certified** on the HubSpot Marketplace, the listing must include a publicly available setup guide URL.

> **Please note:**
>
> You can create separate guides for installing, configuring, using, disconnecting, and uninstalling your app, but all guides must meet the requirements and be linked to the *Setup documentation URL* included on your HubSpot Marketplace listing.

Setup guide requirements

In order to be **listed** on the HubSpot Marketplace, your app must include a setup guide that meets the following requirements:

- Not hidden behind a paywall or sign-in screen.
- Specific to setting up your app, i.e. you cannot link to your website homepage or knowledge base homepage.
- Contains the steps to install and configure the integration.

Learn more about the **full requirements for listing your app** or check out an **example of a listed setup guide** from OrgChartHub.

In order to be **certified** on the HubSpot Marketplace, your app must include a setup guide that meets the following requirements, in addition to the above:

- Adheres to current accessibility, privacy, and GDPR standards.
- Is consistent with the current version of your app and HubSpot.

How to install your app.

How to connect a HubSpot account to your app.

Screenshots of each step of the installation process, including the scope approval screen.

How to configure your app, once installed.

How to use your app, including both automated and manual interactions.

How to disconnect a HubSpot account from your app.

How to uninstall your app from a HubSpot account.

Potential consequences to user data from disconnecting and uninstalling your app.

Learn more about the **full requirements for certifying your app**.

Setup guide template

The following template uses best practices for creating a setup guide. Using this format is not required, but the template is designed to give your app a strong probability of meeting HubSpot's requirements for both listing and certification.

Setup guide for [App Name]

[*App Name*] integrates [*Platform Name*] leads and accounts with HubSpot contacts and companies, which lets users:

[*Description of a use case*]

[*Description of an additional use case*]

Install the app

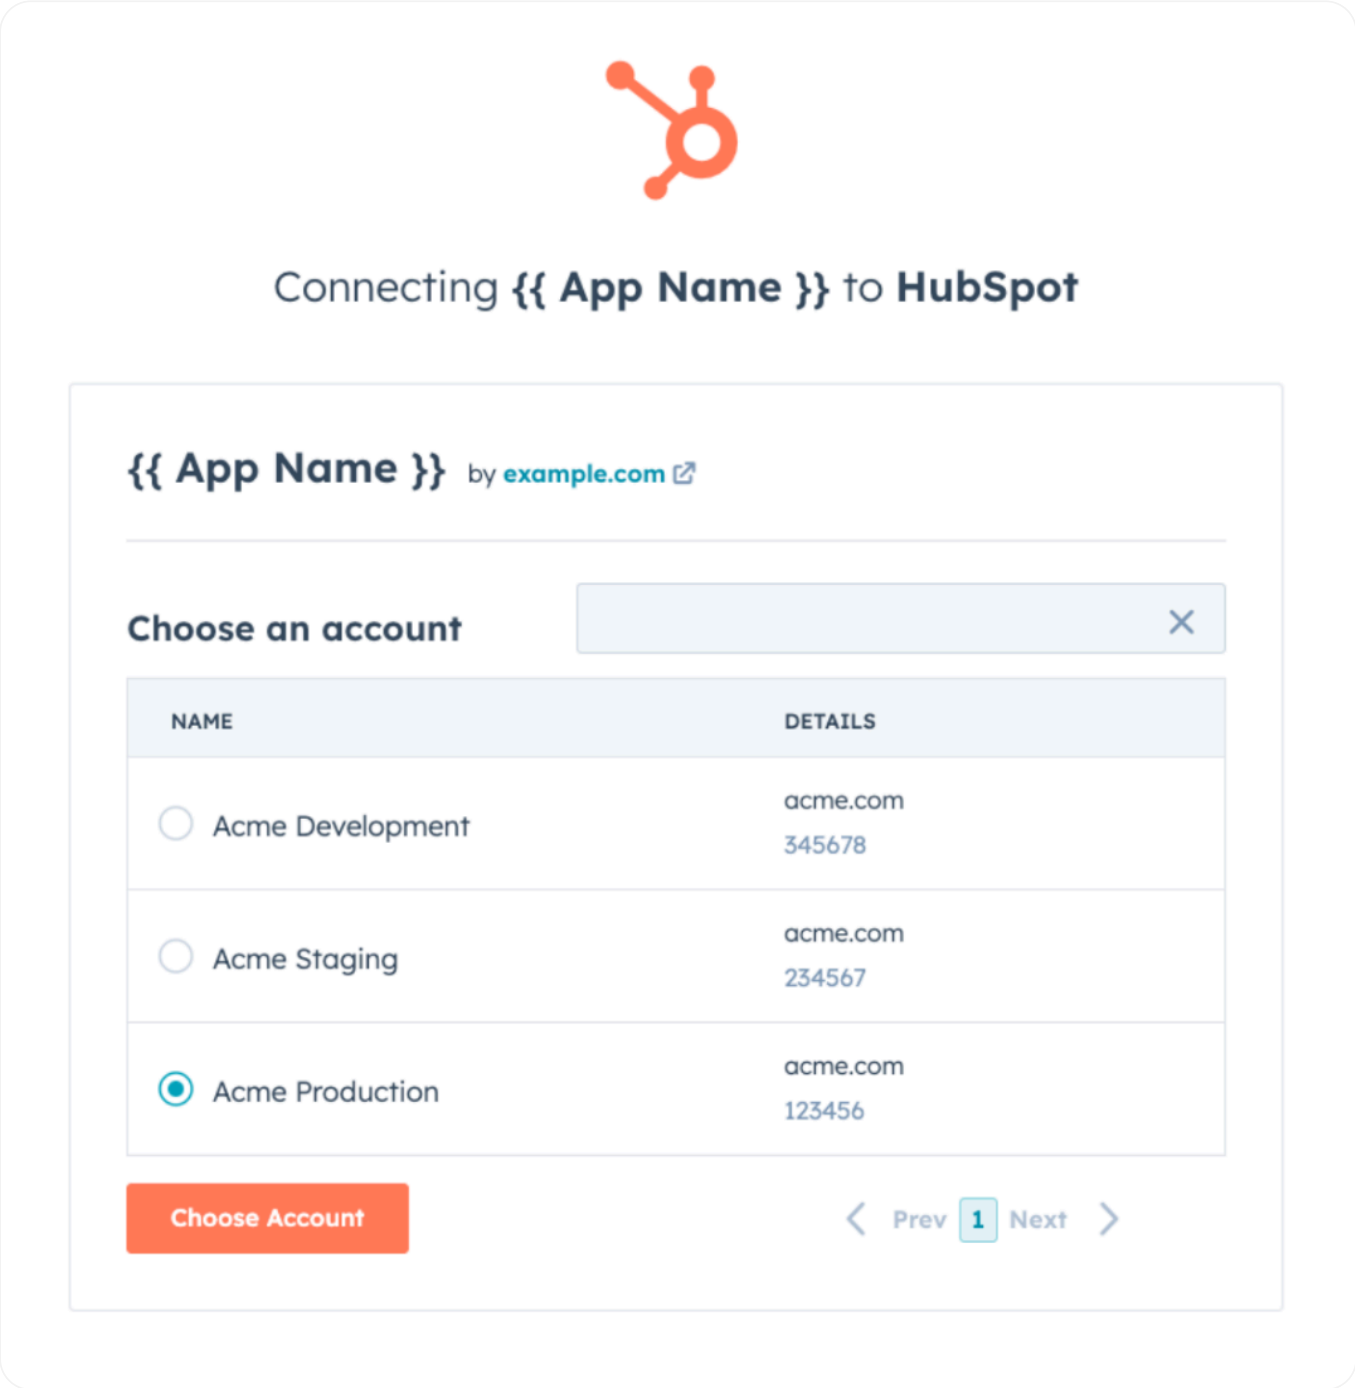
[*Describe instructions to install your app and connect a HubSpot account, with visual aids for each step.*] For example:

Log in to [*Platform Name*].

HubSpot Developers

Click **Install**.

Select your **HubSpot account**.

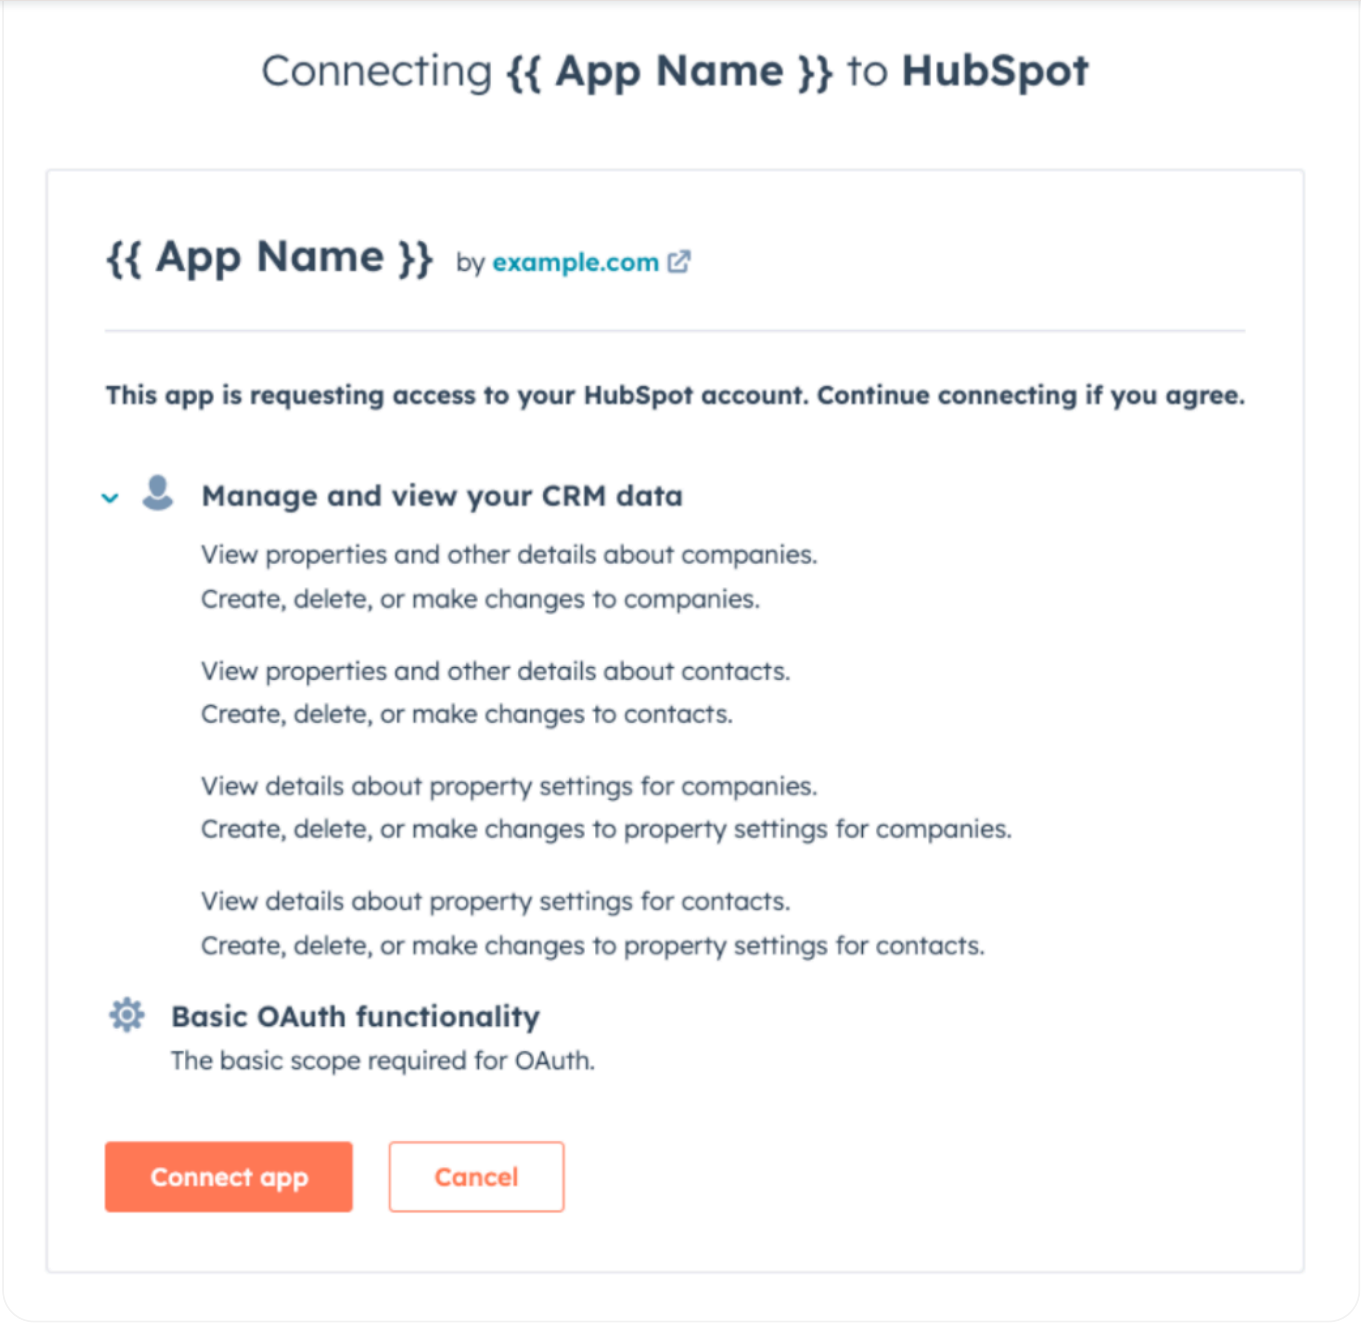


Click **Choose Account**.

Review the requested scopes on this screen. [*App Name*] requests access to read and write contacts & companies, as well as read and edit contact & company properties.

Click **Connect app**.

HubSpot Developers



You will be redirected to the [*Platform Name*] “Integrations” page, and new configuration options will appear.

Configure the app

[*Describe instructions to configure your app’s connection to HubSpot, including visual aids for each step.*]

In your [*Platform Name*] account, navigate to **Settings** > **Integrations** > **[*App Name*]**.

[*Include a screenshot here.*]

Map your [*Platform Name*] lead and account fields to contact and company properties in HubSpot.

[*Include a screenshot here.*]

When ready, click to toggle the **Sync** switch on.

[*Include a screenshot here.*]

Select either **Sync existing records** or **Sync only new records**.

[*Include a screenshot here.*]

Click **Done**.

Use the app

[*Describe how to perform basic manual and/or automated actions with your app with relevant visual aids.*] For example:

[*App Name*] automatically keeps your [*Platform Name*] leads and accounts synced with your HubSpot contacts and companies, according to the settings configured in the previous section. Syncs run at least every 5 minutes. No manual actions are required.

Disconnect the app

[*Describe instructions to disconnect a HubSpot account from your app, including visual aids for each step. You should also describe how disconnecting affects users' HubSpot accounts and data.*] For example:

Note: If you disconnect your HubSpot account from [*App Name*], [*Platform Name*] lead & account data will no longer sync to HubSpot contacts & companies and vice versa. Existing data will remain on your HubSpot records.

Log in to [*Platform Name*].

Navigate to **Settings** > **Integrations**.

Locate the [*App Name*] card.

Click **Yes, I am sure**.

Uninstall the app

[*Describe instructions to uninstall your app from within a HubSpot account. You may simply link and refer to the HubSpot Knowledge Base article on this topic.*] For example:

To uninstall [*App Name*] from your HubSpot account, follow the instructions in **this HubSpot Knowledge Base article**.
